

# Open Science

ZPID is the Public Open Science Institute for Psychology. All of its services are always accessible to various interest groups.

Our services

*Become part of the open science movement*

The Leibniz Institute for Psychology Information (ZPID) in Trier (Germany) is an internationally renowned research support organization in psychology and a member of the prestigious Leibniz Association.

To fulfill the ever-increasing research infrastructure needs expressed by researchers and psychology professionals, ZPID is in the process of strategic expansion directed at meeting these needs to become psychology's one-stop research service center. Current as well as future ZPID research areas and services are based on and guided by the values of open science and open innovation.

Join the growing ZPID team at the forefront of the open science movement! Current opening:

## Full Stack Software Engineer (PHP) m/f/d

(salary group TV-L E13, 100%, initially limited to 2 years)

Preferred start date is January 1st, 2020 or later

### Duties and functions:

The successful applicant is expected to work on development and maintenance of all PHP based software in operation at ZPID within our department "Digital Research Development Services" (DRDS). This ranges from work on completely new services, like our pre-print platform PsychOpen Exchange, to already established products, like PsychArchives. You help to design, program and later maintain the whole architecture of our PHP-based software systems from bare operating systems up to the APIs. You identify promising open source software libraries for ZPID's products and contribute actively to them. In your daily project work you collaborate with product owners from different professions, like Psychology, in an agile environment (SCRUM).

Your technical work is complemented by regularly and independently observing trends and developments in software engineering. You create strategic concepts, write scholarly articles for peer-reviewed journals and give talks around relevant topics of your work. The results of your scientific work will you help to put into practice within DRDS.

### Your profile:

- Master-level degree or higher in Computer Science, Software Engineering or other relevant field
- Very broad knowledge of technologies used in the PHP ecosystem. Experience with Symfony is a plus.
- Good knowledge of software system architectures
- Ability to analyze and responsibly modify legacy system architectures created by others and ability to conceptualize system architectures for new software
- Good knowledge of web service frontend design
- Interest in team-based collaboration with non-technical experts from other domains, e.g. Psychology, in an agile working environment (SCRUM)
- Ability to transform informal, non-technical descriptions of features into actionable technical development tasks
- Competence in project planning, presentation to non-technical audiences, implementation and controlling
- Very independent and thorough working, research and vocational training style
- Excellent English skills. Knowledge of other languages is a plus.

In order to apply, please register with our online portal here
